Our Process

A website is your business' 24x7 salesman living on the internet. We collaborate closely with you to deliver a website that gives your business true value. Here's how we make it happen:

1.

Planning

1-3 days

We understand your business and tailor a solution to your needs.

We start with a kick-off meeting to understand your goals, followed by a tailored solution proposal that aligns with your vision and business needs.

2.

Design

1 week

The design of your website will be finalized in this stage.

Our team crafts a captivating design, ensuring every element reflects your brand. Once approved by the client, the design sets the foundation for a seamless development stage.

3.

Develop

1 week

Coding and implementation of features

We turn the approved designs into reality. Every feature is carefully implemented, ensuring functionality and performance.

4.

Launch

1-3 days

Testing & launch of your website followed by a handover.

Your website goes live, optimized for SEO and tested for flawless performance. We also provide training to ensure you're set up for success from day one.

Thank you!
